

LÄSSER CLASSIC 2

SEQUIN - CORD - THERMOCUT

LÄSSER CLASSIC 2 – SEQUIN

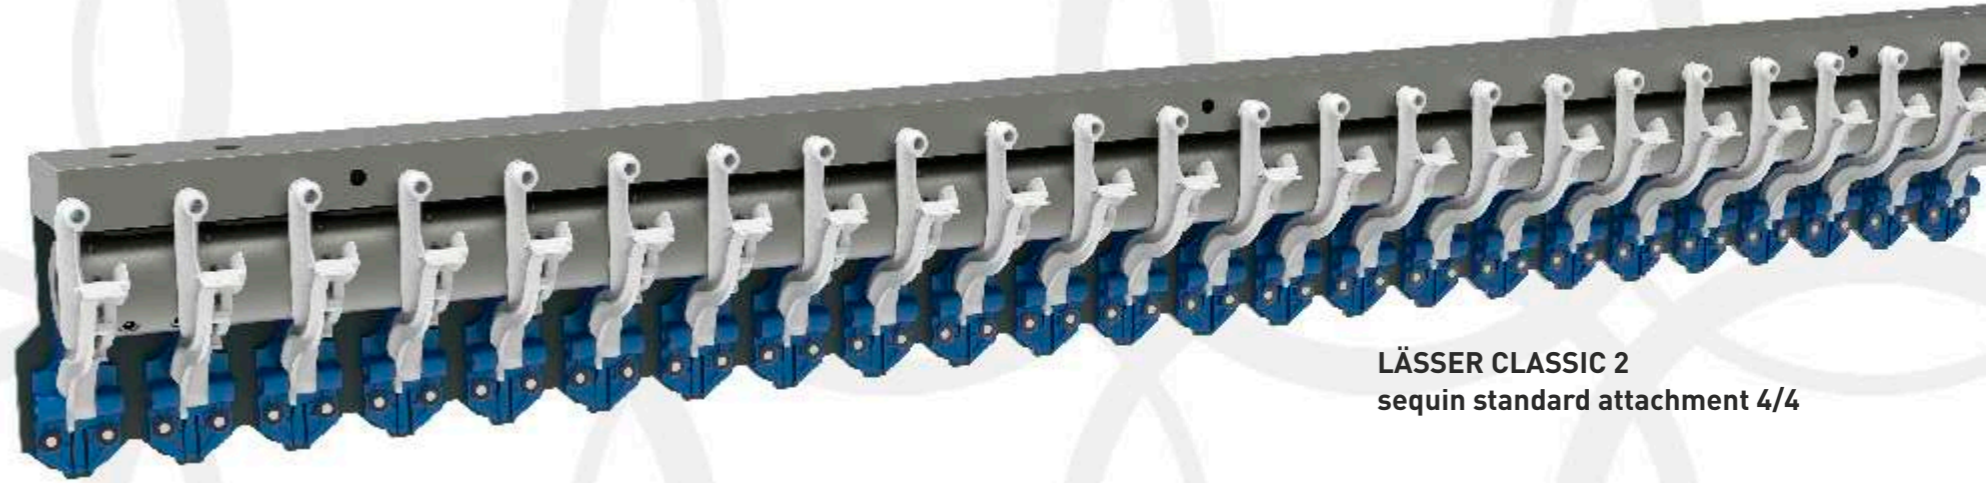

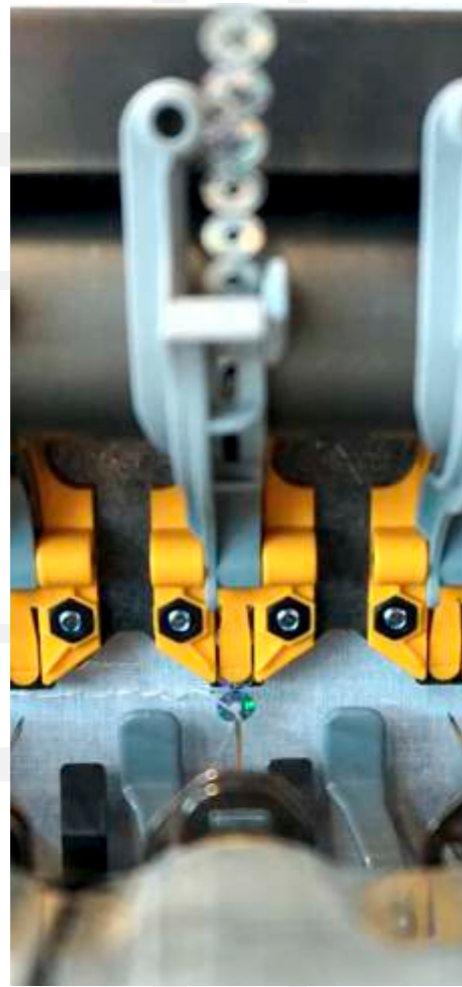

LÄSSER CLASSIC 2 – sequin standard / sequin combo attachment

The sequin attachment CLASSIC 2 is available in standard repeat 4/4 or in 8/4 repeat in combination with two sequin sizes.

Whereas the combo attachment offers more flexibility regarding the sequin size, the standard attachment offers more flexibility regarding the repeat.

More than 40 years of experience

LÄSSER is the pioneer of sequin processing with many years of experience in this field. The CLASSIC 2 sequin attachment is a cost-effective extension with high added value that allows you to achieve numerous different effects.

LÄSSER CLASSIC 2 – sequin attachment

User-friendly, trouble-free and high-performance

The LÄSSER CLASSIC 2 sequin attachment is very easy to access and to operate. The precise movements of the attachment result in top-quality sequin embroidery.

Thanks to the new drive concept the sequins are placed with astonishing speed. The unbeaten and smooth performance of the CLASSIC 2 sequin attachment represents a huge competitive advantage.

For the LÄSSER CLASSIC 2 sequins are available in various sizes: 3 mm, 4 mm, 5 mm and 7 mm. With the combo attachment two different sequins sizes can be used alternately. This means low investment costs and easy adaption to changing fashion trends.

LÄSSER CLASSIC 2 – CORD & RIBBON

LÄSSER CLASSIC 2 – cord & ribbon attachment

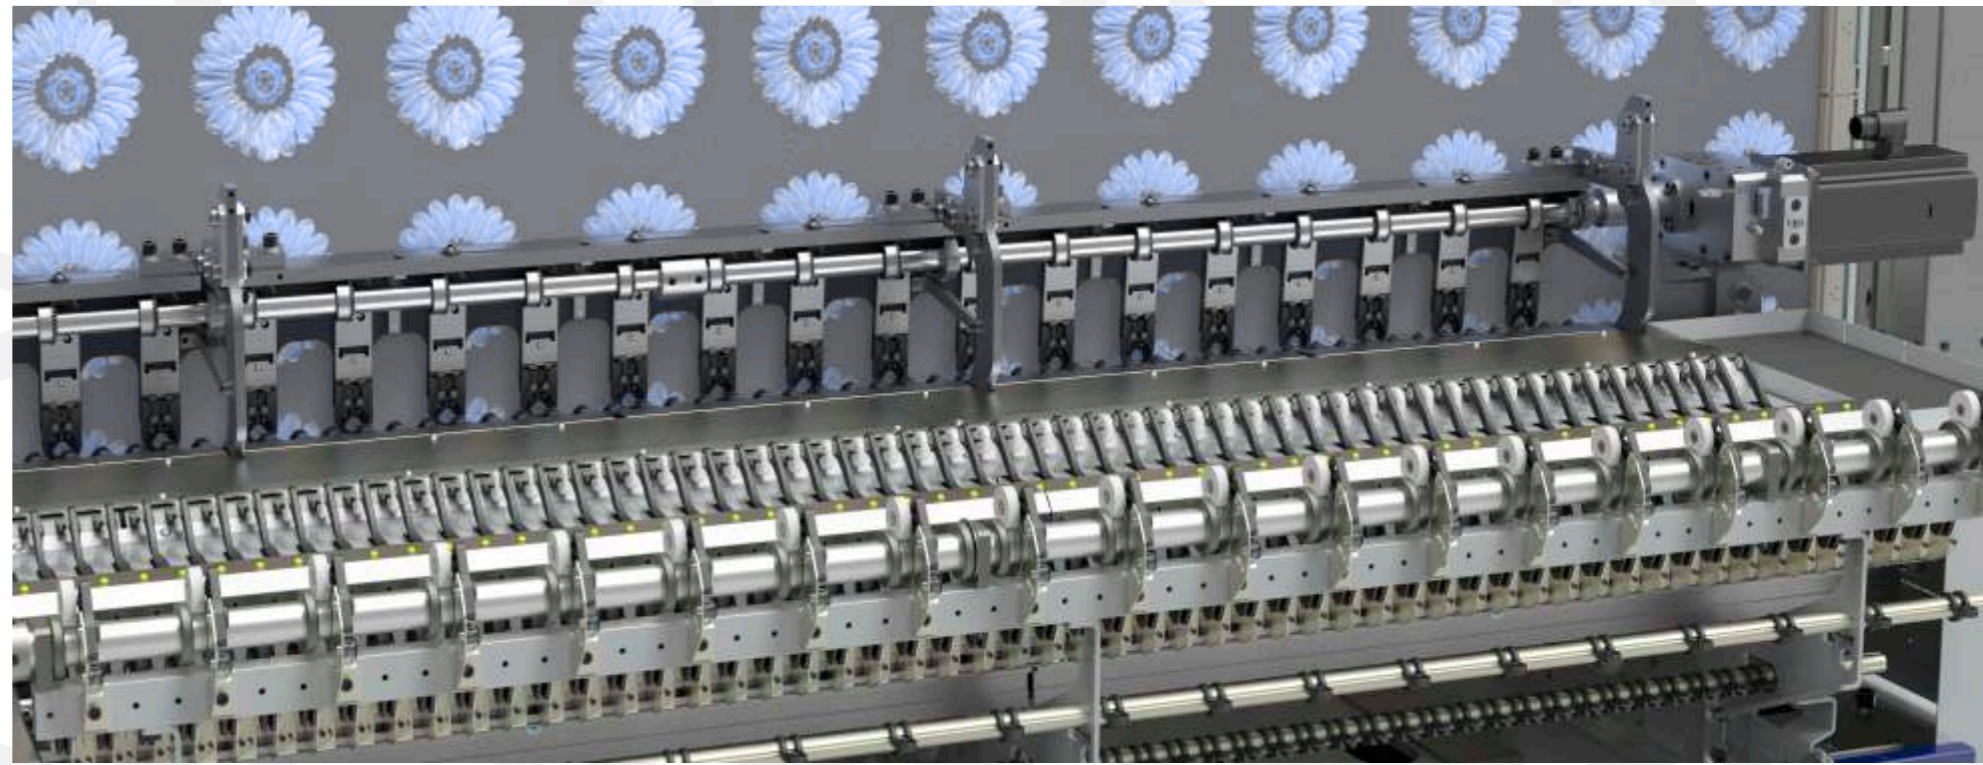

The LÄSSER CLASSIC 2 is available as cord and ribbon attachment. The servo-controlled feeding system works fully automatically and always feeds the right amount of cord-yarn or ribbon-band according to the requirements of the design – regardless of whether the machine embroiders cord, ribbon or yarn.

The beauty of three-dimensional contours

The fine band is placed gently on the fabric by the CLASSIC 2 attachment to create fashionable shapes and motifs. A special appeal is added to the fabric by the three-dimensional contours of cord that significantly reinforce the visual effect. The use of cord or ribbon is an upgrade for every fabric – no matter if it is produced for curtains, high fashion or a simple pillow.

Fully integrated

The LÄSSER CLASSIC 2 cord & ribbon attachment is fully integrated in the machine by hard- and software. The only challenge that remains is the creation of the design itself – the conversion of the design to the machine is amazingly simple.

cord attachment

LÄSSER CLASSIC 2 – cord & ribbon attachment

Fashion trends change quickly; one day cord fabrics may be in demand, the other day customers might ask for fabrics embellished with ribbons. Therefore the attachment can be easily converted from cord to ribbon, or vice versa, in a short amount of time.

The cord & ribbon attachment is developed and manufactured by LÄSSER in Switzerland, which guarantees high-end quality and ensures the availability of spare parts for configuration changing.

LÄSSER CLASSIC 2 – THERMOCUT LTC TH

LÄSSER CLASSIC 2 – thermocut LTC TH attachment

The CLASSIC 2 thermocut LTC TH technology combines many years of experience with the well-proven LÄSSER thermocut attachment with the latest technological know-how. The maintenance and the service of the attachment are very simple and fully integrated in the machine.

High-end fashion – exclusive application work

Thanks to the LÄSSER CLASSIC 2 TH technology, fine and exclusive application work can be done in no time. Premium quality and at the same time cost-effectiveness were of particular importance to us while developing the thermocut LTC TH attachment.

Easy to operate

The handling, even when dealing with applications with multiple layers, is surprisingly simple. The cleverly constructed cloth presser defines the exact distance between cutting point and material. This enables a consistently good and even cutting of the material.

The LÄSSER CLASSIC LTC TH attachment is clearly arranged, the cutting process can be overseen at any time. After the cutting process the head is brought to a parking position.

LÄSSER CLASSIC 2 – LTC TH technology

The TH technology is a further development of the well-proven LÄSSER LTC technology.

The attachment is completely developed and manufactured in-house. The cutting process works without direct contact. The material is fused with almost no fumes emission. No venting system is required.

The improved performance of the LÄSSER LTC TH system makes your products very competitive and cost-efficient.
